Dear Mr. Cerrone and Mr. Young,

I write you today to commend you on the quality of your product and service. As the coordinator for the GOTV effort in Burlington County I experienced the value of your product first-hand. The effectiveness not only impacted the State Senate and Assembly races but the County and local races as well. Without utilizing the FTIN system I feel that the outcome of the election would not have been the same.

Our volunteers and staff were easily trained on your products and the system was easily integrated into our GOTV operation. The numbers speak for themselves, turnout was significantly higher in the districts that we used your product. Not to mention the “real-time” accountability of voter turnout was priceless information when allocating resources in the field to various districts throughout our county. The ease in which your product can be learned and utilized for GOTV solidifies the important role it can play for years to come.

I thank you for the superb job your staff and Tech Support Center provided and I look forward to working with you again in the near future.

Sincerely,

Jason R. Carty  
GOTV Coordinator
