Dear First Tuesday in November,

When we were initially approached by First Tuesday in November, there was a certain amount of skepticism on our part because of its limited track record and high reliance on new technology. This all changed within hours on Election Day when we could literally see our activity translating into targeted votes. By the time the polls closed, we had realized a targeted voter turnout of between 75% and 86% for the three candidates. It was apparent to all that FTIN played a crucial role in our election victories. Thanks again and good luck with this fabulous cutting edge Get Out The Vote technology.

Sincerely,

Mayor Mike Becker

Commissioner Dan Campbell
